

CREWE PHOTOGRAPHIC SOCIETY

Web Master's Report. 19th.April, 2018

- This season our website has received a slight increase in the number of hits it's had.
- The homepage is the notice board for current CPS news and events. It's regularly kept up to date by John and I'd like to thank him for keeping it up to date in a prompt manor.
- Although our website holds limited personal information it would wise to upgrade it to the https protocol so data transferred over internet is encrypted. We need to purchase a certificate to do this which would cost us £54 annually from Heart Internet who supply our web space. It's not urgent, but will need doing some time.
- I'd like to thank Paul Hill, John Royle and Bob Brown for submitting articles about their photography. Hopefully this will stimulate more members share the photographic experiences with other members.
- Over the summer I would like to revamp our website's format to make it more up to date.
- I've updated our website's menu structure by creating a 'Resources' header with sub menus of 'Documents', 'Links', 'Results', 'Events' and a new item of 'Places to Visit'.
- I'd like to highlight our individual members' photographic experience and skills on the website. This would help other members to know who to approach for specific advice.
- I would like to thank Ian McNab for his continued support with the routine maintenance of the site.
- Don't forget that the Web, Flickr, Facebook and twitter sites are open all summer so you can keep update with events and keep in touch with fellow members through these mediums.

Peter Robinson.
